

Creating Citations & Avoiding Plagiarism

What are citations?

Citations are addresses. They tell readers where to find a specific piece of research.

Think of a postal address. There are certain pieces of information that must be included and they must be presented in a certain order (*format*) so that a letter can find its destination. Postal addresses may vary slightly in different countries or regions, but in the end they all contain the same pieces of critical information. This can be compared to the slightly varied formats of different style guides for citations.

Citations provide basic information like **author**, **title**, **publisher** and **year of publication** that allow researchers to locate a particular piece of information.

Why are citations needed?

- When we use someone else's ideas, we use citations to tell others exactly where that idea came from (*attribution*).
- Citations are critical for scholarly communication and knowledge creation because they allow researchers to trace the origins of and development of ideas over time (*communication*).
- Citations lend credibility to research by situating it within a larger scholarly dialogue (*credibility*).

How to write citations?

Just like addresses, citations have a very specific format, and different academic disciplines may have slightly different ways that they format citations; adopting the format from one of several style-guides.

Please note: **FoB uses APA-style citations** and **FoAD uses Chicago-style citations**.

It is recommended to use **Citation Management Software** such as **Zotero** to store your sources and generate bibliographies.

APA

Read more

APA-style citations are outlined in the *Publication Manual of the American Psychological Association: the Official Guide to APA Style*, but the basic format is as follows:

Surname of Author(s), Initial of first name of Author(s). (Year of Publication). *Title* (Edition No.)
. Publisher. URL

Basic Example

Maesse, J., Pühringer, S., Rossier, T., & Benz, P. (Eds.). (2021). *Power and influence of economists: Contributions to the social studies of economics* (1st ed.). Routledge. <https://doi.org/10.4324/9780367817084>

Further Examples

Chicago

Read more

Chicago-style is outlined in *The Chicago Manual of Style (CMOS)*, but the basic format consists of two parts:

1. **An in-text citation (Author-Date Format)**
2. **A bibliography**

Plagiarism

What is plagiarism?

Plagiarism means presenting someone else's work, or your own previous work in the case of self-plagiarism, as your own. Plagiarism is intellectual theft and is regarded as academic misconduct.

Types of plagiarism

There are different types of plagiarism and all are serious violations of academic honesty.

- **Direct plagiarism:** the word-for-word transcription of part of someone else's work, without attribution and without quotation marks.
- **Mosaic Plagiarism** occurs when a student borrows phrases from a source without using quotation marks, or finds synonyms for the author's language while keeping to the same general structure and meaning of the original.
- **Self-plagiarism** occurs when a student submits his or her own previous work, or mixes parts of previous works.
- **Accidental plagiarism** occurs when a person neglects to cite their sources or unintentionally paraphrases a source by using similar words, groups of words without attribution.

Avoiding plagiarism

Plagiarism can be committed unintentionally. Make sure you always provide proper source references so that others can see which ideas are those of other authors.

Providing proper source references also enables other people to check these sources.

Additional Resources

[Purdue OWL \(Online Writing Lab\)](#)

The Online Writing Lab (OWL) at Purdue University in the US has been online since 1995 and is one of the most comprehensive sources available regarding style and citation. Indeed, it often has more information than the actual style guides due to the large number of examples available.

Citation Generators

If you have the information about an article or book, you can use one of the tools below to put it in the right format.

- [ZoteroBib](#)

A tool for the quick generation of a citation using a URL, DOI, ISBN, arXiv ID, PMID, or title.

- [KnightCite](#)

A tool from Calvin College's Hekman Library. Choose from MLA, APA, & Chicago citation styles.

- [Citation Builder](#)

Another library created tool - this time from NC State University Libraries. It has is the most simplified of the tools - choose the type of resource you have, fill out the information, and then select either APA or MLA citation style. Click Submit. It is ready to copy & paste.

Thanks to the following sources for providing partial inspiration/content for this page: [University Library Groningen](#).
