DBIS - Browse all BI databases

[DBIS \(Datenbank-Infosystem\)](#) is an index of all research databases available to the Bi community.

Students and faculty at BI have access to hundreds of research databases from several different sources. Thanks to [DBIS](#), all databases can be browsed by subject or title, and accessed from one interface.

Read more

At BI we have access to databases provided by the [Nationallizenz \(DFG\)](#) and our partnership with [Bahçeşehir University](#); plus a growing number of open-access resources. While wonderful to have access to such a large number of resources, it can be inconvenient to try to sort out what is available.

That's where DBIS comes in. [DBIS was developed by the University of Regensburg](#) to address just such a problem and is continuously maintained by the ~350 member libraries. Indeed, you may recognise the DBIS interface since it is used by nearly all German university and regional libraries.

EZB - Browse all BI journals

The [EZB \(*Elektronische Zeitschriftenbibliothek*\)](#) is a service to facilitate the use of scholarly journals on the Internet. It offers a fast, structured and unified interface to access full-text articles online.
