

Research Database Index - Browse all BI databases

The [Research Database Index](#) is an index of all research databases available to the BI community. Students and faculty at BI have access to hundreds of research databases from several different sources.

The screenshot shows a web browser window with the URL `library.berlin-international.de`. The page header includes the library logo and a "LOG IN TO YOUR ACCOUNT" link. A search bar is located below the header. Navigation buttons for "About us", "Advanced search", and "Latest News" are present. The main content area is titled "Research Database Index" and features a section for "Available Databases" with filters for "All Subjects", "All Formats", and "Access (On Campus/Remote)". A search filter input field is provided. Two informational boxes are present: a yellow one stating that remote databases require a UMIS login, and a blue one providing instructions on how to access on-campus only databases. Below this, two database entries are shown: "17th - 18th Century Burney Collection Newspapers / BBCN" and "19th Century British Library Newspapers / BNCN". The first entry lists subjects as "multidisciplinary", format as "periodicals", and access as "on campus only", with a brief description of the collection.
